

International Vaccine Centre

Photographic highlights from
THE GRAND OPENING
of the International Vaccine Centre
held on Friday September 16, 2011

Innovation. Made in Canada.
MOST ADVANCED IN THE WORLD

VIDO-InterVac

Vaccine and Infectious Disease Organization -
International Vaccine Centre

**UNIVERSITY OF
SASKATCHEWAN**

On September 16, 2011 we celebrated the grand opening of the International Vaccine Centre (InterVac) –the world’s most advanced containment level 3 facility for infectious disease research and vaccine development.

CLOSING THE GAP ON Infectious Disease Research

We were honored to host Prime Minister Stephen Harper, Saskatchewan Premier Brad Wall, Saskatoon Mayor Don Atchison and a host of senior representatives from government, industry and academia at the event. The grand opening celebration also launched National Biotechnology Week 2011 in Canada.

We hope you enjoy this collage of pictures taken from the event. I look forward to communicating with you in the future about the impact InterVac is having on the landscape for vaccine research and development.

Dr. Andrew Potter, Director and CEO

A handwritten signature in blue ink that reads "Andrew Potter". The signature is fluid and cursive.
